

1-to-2 connection box

Overview

RJ45 Splitter 1 to 2: The 1 to 2 port ethernet adapter allows a router or Ethernet switch to simultaneously connect to two Ethernet networks. 1000Mbps High-Speed Transmission: The ethernet switch supports a maximum of 1000M Ethernet network connections, providing lightning-fast network transmission speeds for two output signals, with no crosstalk between the two sets of signals, and backward compatibility with 100Mbps/10Mbps network. Ethernet Splitter 1 in 2 :The LAN splitter can connect two computers via one network cable, allowing two devices to access the Internet at the same time, eliminating the trouble of repeatedly plugging and unplugging it. It is the perfect choice to solve the problem of insufficient performance. Gigabit Ethernet Splitter 1 to 2: Easily connect two devices to your network without the need for additional cables. It is a simple yet efficient network. The wall mount ftth termination box is designed for last-mile fiber optic connectivity, enabling reliable transition between distribution cables and subscriber drop cables.
