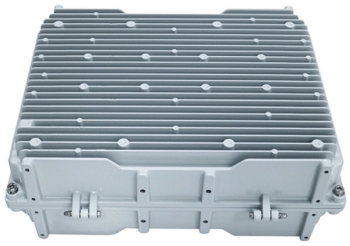
220V thermal relay protection device



Overview

It is used to provide overload protection open-phase protection and protection against unbalanced current for motors and it can also avoid heating in electrical equipment. 1A~6A, current rating 25A, working voltage 220V~690V. Description Ziehl PTC thermistor relays protect motors, transformers, machines and equipment against thermal overload. These are according to DIN EN 60947-8 and are. ABB's CM-MSx. With ZIEHL PTC Sensors MINIKA ® applied they offer best solutions for nominal response temperatures 60°C. 180°C. Do you have any questions or require products tailored to your requirements?

TeSys LR9F electronic overload relay, thermal setting range 132-220A, class 20, for protection of motors 90-110kW@400V. to be mounted directly below a TeSys F 3-pole contactor LC1 F185, F225, F265, use of a support mounting plate LA7F901 is recommended (to be ordered separately).

Thermistor motor protection relay CM-MSS.41

Application / Monitoring function The thermistor motor protection relay CM-MSS monitors the winding temperature and thus protects the motor from overheating, overload and insufficient cooling in

Ziehl MSR 220 KA Tripping unit No. of relay outputs: 2

Even for direct monitoring of explosion-proof motors in protection type Ex e and Ex d in hazardous areas (zones 1 and 2) and in the presence of combustible dust (zones 21 and 22).

PTC-Resistor Relay MSF220V/ MSF220VU

The MSF 220 V is particularly suitable for the temperature monitoring at dry transformers. 3 PTC-circuits with different nominal response temperatures

Thermal overload relays

Thermal overload relays. Thermal overload relays are economic electromechanical protection devices for the main circuit. They offer reliable protection for motors in

LR9F5571

On the front of the relay, it provides a thermal adjustement dial, buttons for test, stop & reset, a trip indicator, trip auxiliary contacts 1NO+1NC.
