

72-core fiber distribution box with flange

Overview

High-density 72 core fiber optic terminal box with SC FC LC connectors, designed for 19" distribution frames, featuring 1.0mm steel construction for durability. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. Welding & distribution module in integration: Plastic structure, easy for installation of inlay, convenient. At present, we have antennas, optical distribution products, optical fiber jumpers, optical cables, cabinets, and filters, passive components and other production capacity We have strong R&D and production capacity and advanced testing equipment, including Network Analyzer System, Waterproof test. The 32 port fiber distribution box serves as a distribution point for the connection between feeder cable and distribution cable or drop cable in FTTx networks. It integrates splicing, signal splitting, storage and cable distribution function within a single enclosure for outdoor installation. Estimated delivery dates - opens in a new window or tab include seller's handling time, origin ZIP Code, destination ZIP Code and time of acceptance and will depend on shipping service selected and receipt of cleared payment cleared payment - opens in a new window or tab. Delivery times may vary. YFDC-144A Fiber Distribution Cabinet, also known as Fiber Optic Distribution Hub, Fiber Optic Distribution Cabinet, has a variety of functions including leading optical cables, fixing and protecting, splicing and protecting fiber optic, storing and managing pigtails, parking lot, routing. ·Small size and light weight for easy installation compact body ·Wall mounted with mechanical protection function ·Available for FC, SC, ST, LC adapters ·Fiber can get in from bottom or side ·Anti-UV, Ultra violet resistant and rainfall resistant Competitive Advantage DYS strictly enforce the ISO9001.
