High-performance optical fiber cable designed for outdoor aerial applications with robust construction and long-term reliability. Standard marking includes company name, fiber cable name, core count, fiber type, production year, and length. Marking is printed every 1 meter. Offering unique properties and benefits for different types of use, our communications optical fiber. The Figure 8 fiber optic cable stands as an exceptional solution for long-distance and inter-office communications. Characterized by its unique "Figure 8" profile, this cable incorporates a steel stranded wire as its self-supporting component, offering unparalleled tensile strength during both. Fiber optic cables for outdoor applications are engineered to withstand the more demanding conditions seen outside, from environmental extremes to mechanical forces. These are the outdoor fiber optic cables you see strung along telephone poles (aerial), installed inside an underground duct, or even. 5-Layer Heavy-Duty Architecture: Features a tight-buffered fiber, helical stainless steel armored tube, DuPont Kevlar...
