

Aggregation Switch with 16 Fiber Ports

Overview

With 16 SFP ports, it is ideal for fiber rings, zone aggregation, and long-distance backbone interconnects, while 8 Gigabit RJ45 ports handle local copper access. It has a built-in power supply and 1U/19" cabinet installation. OVERVIEW The ONV33168FM is a gigabit L2+ managed Ethernet fiber switch independently developed by ONV. It handles traffic on all ports at line rate without any packet loss. The total non-blocking throughput is up to 160 Gbps. For fiber connectivity, it features 12 Omada 16-Port 10GE SFP+ L2+ Managed Switch. As a 10G switch with full SFP+ ports that seamlessly integrates into the Omada Software Defined Networking (SDN) platform, SX3016F allows for remote and centralized management, anywhere, anytime. The EX3024F Intelligent Ethernet Fiber Aggregation Switch offers zero-touch deployments, policy-based automation, auto device profiling and segmentation, and a non-blocking. NEU308164CGM is designed for industrial convergence where many fiber links must be aggregated into a manageable distribution layer. It offers faster replacement and priority support, covered for 5 years. High-performance 10G SFP modules for optimal connectivity.
