

# Applicable Standards for Power and Lighting Distribution Boxes

## Overview

The IEC (International Electrotechnical Commission) and BS 7671 (British Standard for Electrical Installations) both provide essential requirements for electrical installations, including those for fuse boards like garage unit, consumer unit and distribution board. While the IEC 60364 standard. The Group's environmental commitment is centred on 3 guiding lines: taking on board environmental management in the running of its industrial sites, reducing the environmental impact of its products by eco-design, providing environmentally friendly solutions that contribute to energy savings. This document is not intended as a substitute for a detailed study or operational and site-specific development or schematic plan. It is responsible for evenly distributing electrical power from the main power supply to the various circuits and appliances throughout the building. A distribution box is the heart of any electrical system. Whether in a home or an industrial facility, this box keeps.
