

Are raw material prices for optical cables rising

Overview

After an extended period of subdued pricing in several regions, optical fibre prices are rising sharply alongside sustained demand growth. D bare fibre prices surged by more than 80% between November 2025 and January 2026, pushing China prices above Europe and India. With the cost of raw materials climbing, many procurement managers are asking: Should we wait for prices to drop, or is a massive surge in order volume imminent?

At Shandong Yibo Optronics, with 13 years of manufacturing expertise, we analyze why the market is moving from "hesitation" to "urgent. The global fiber optic industry is entering a new pricing cycle. For distributors, telecom. Although optical modules are high-tech products, raw material costs account for as much as 60%-70% of the total cost, with metal materials being one of the major cost items. Gold fingers and connectors : The gold fingers (gold-plated contact points on the PCB board) of the optical module must use a. See why G. 652D optical fiber prices are rising in 2025-2026, how FTTH cable budgets are affected, and what procurement teams in Europe, Latin America, Africa and the Middle East can do to manage risk. According to the latest industry research, the price of G. 652D fiber has already soared to over 50 yuan per core-kilometer. 657A2 grades have all seen dramatic increases.
