

Base Station Complete Power Distribution Box

Overview

380VAC / 100A intelligent AC power distribution box, designed for new base stations, set up a field-level power distribution and equipment management platform, the oil machine, the state of utility power, lightning protection status to achieve remote monitoring, the base. 380VAC / 100A intelligent AC power distribution box, designed for new base stations, set up a field-level power distribution and equipment management platform, the oil machine, the state of utility power, lightning protection status to achieve remote monitoring, the base. Often referred to as the brain center, this includes: Baseband Unit (BBU): Handles baseband signal processing. Remote Radio Unit (RRU): Converts signals to radio frequencies for transmission. Power Supply System This. BJ Electric according to the base station site application environment and the group company on the AC power distribution box, smart meter related norms, for the tower tailored: customized a set of AC power distribution intelligent solutions, to help improve its power distribution management level. Basic requirements of communication network equipment for power system: 1. High stability: Voltage fluctuations, noise and transient voltage must meet the standards to ensure the normal operation. PREMIUM CONSTRUCTION POWER DISTRIBUTION BOX: Crafted by WESTERN, the 6506TLSX Temp power box features a durable blend material for long-lasting performance in demanding environments. Need help?
