

Cable tray bends tees and crosses

Overview

Cable tray fittings like elbows, bends, tees, crosses, and risers are used to change the direction of cable routing. To facilitate easy installation of cable trays we also manufacture accessories e. Vertical bend, horizontal bend, cross and horizontal tee. Our Perforated Type Cable Trays are used extensively in Buildings. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Materials and finishes available are mild steel pre galvanised as standard with mild steel hot dip galvanised after manufacture and stainless steel grade. The following cable trays are available : pre-galvanised cable tray, post galvanised cable tray, epoxy powder coated cable tray, plastic coated cable tray, stainless steel 316 grade cable tray and stainless steel 304 grade cable tray. T&D UK can provide fast delivery throughout the UK for the. ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require additional protec eferred to support and protect numerous small. Common cable tray fittings include cable tray elbows, tees, crosses, bends, risers, reducers, bolts and nuts, locks, expansion screws, supporting brackets, suspension rods, cross arms, bases, connecting plates, covers, fixings, cable cleats, and system dividers. These fittings are typically.
