

# Dedicated lines and fiber optic cables

## Overview

From a technical point of view, most dedicated lines use fiber-optic connections or Ethernet leased lines. A dedicated fiber line typically provides businesses with dedicated Internet access, delivering a private, high-speed connection through fiber-optic cables. This means the connection is not shared with other users, resulting in faster and more reliable speeds. What Is a Leased Line?

A leased line is a dedicated, fixed-bandwidth internet connection that provides exclusive access between a. An Active Optical Network (AON) is a point-to-point network architecture where individual dedicated fibers connect directly from a central hub (like an ISP's central office) to each end-user. Unlike passive networks, AON uses electrically powered network switching equipment, such as routers, switch. When you have a dedicated internet line, it implies a confidential link between your office and the Internet Service Provider.
