

# Fiber optic router displays a light

## Overview

This light shows whether your ONT is getting power. What to check: Make sure the power cable is securely plugged into both the ONT and a working wall outlet. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do. Typically, these lights correspond to various router functions such as power. The LEDs on your modem, optical network terminal (ONT), router, or modem/router combo (gateway) are most likely blinking because they're communicating what the device is doing, or there's an error. POWER Normal: Solid/stagnant light. If OFF: The router is not powered — check the socket, adapter, or power. Learn what each light on your fiber equipment means—from power and fiber signal to Ethernet and phone service—and how to quickly troubleshoot issues. And knowing the Modem router lights meaning can save you hours of troubleshooting frustration and help you diagnose problems before they completely.
