

# Fiber optic router only has 2 4G

## Overview

4GHz-only routers are outdated —they bottleneck speed and increase latency and network congestion. Dual-band and tri-band routers boost speeds, cut congestion, and add numerous useful features that contribute to your connectivity. 4 GHz and 5 GHz WiFi bands directly impacts your network's performance, but integrating fiber optic infrastructure takes this a step further. This guide. Amazon eero 6+ mesh wifi router - Supports internet plans up to a Gigabit, Coverage up to 1,500 sq. 5 Gbps, Coverage up to. TP-Link has WiFi Access Points that you can shut off the 2. 4Ghz or 5Ghz antenna for the use case you need. A buddy of mine recommended TP link's Deco mesh. I've been nothing but thrilled with it. What should I do?

Both SSID lights are on and Hide SSID option is off for both. 2025-02-24 00:45:51 - last edited 2025-03-20 19:04:00 Hi. Are you in search of the perfect router for your optical fiber internet connection?

Look no further! In this guide, we'll explore the top options available on the market to ensure you experience blazing-fast speeds and seamless connectivity. Whether you're streaming, gaming, or working from home. I bought a Jetstream ac1900 router because it was a reasonably priced option that is suppose to be rated for 600mbps 2.
