

Four-network integrated optical distribution box product

Overview

This terminal box terminates up to 4 fiber optic cables, offers spaces for splitters and up to 4/8 fusions, allocates 4 SC adapters and working under both indoor and outdoor environments. It is a perfect cost-effective solution-provider in the FTTX networks. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. OTRANS strives to provide you with professional, reliable. This 4 port Fiber NID (Network Interface Device) is designed for connecting drop cable to ONT devices by the connectorized fiber optic patch cord, and protect the optical fiber from damage. Featuring a functional double-layer structure, it provides a clean separation between splicing and patching:. This Lockable IP55 distribution box is supplied loaded or unloaded and offers the ability to terminate 4 fibers housed in a strong robust ABS enclosure for indoor and outdoor applications. For termination of 2 to 4 optical fibers in a customer terminal point Connector holder 2x SC simplex, 1x SC duplex, 2x ST, 2x FC, 2x E2000 or 2x LC duplex. Splice protector crimp ANT/telet (120 pcs.) SC/APC-Pigtail 9/125 μ m. Wherever glass fiber connections have to be installed in a harsh environment - in offices, industry or Fiber-to-the-Building/-Home customer access networks - high demands are made on the value and flexibility of the distributor housing and easy access whilst installation and maintenance. The optical distribution box provides versatility.
