

Gytc8s Outdoor Optical Cable Manufacturer

Overview

Bynet GYTC8S/GYTC8A Figure-8 self-supporting optical fiber cables are designed for aerial deployments, offering both fiber transmission and mechanical support in a single compact cable. The GYTC8S cable features an "8-figure" or "figure-8" design, integrating a communication unit (loose tube layer-stranded structure) and a supporting unit (steel strand) into a single cable. This self-supporting design eliminates the need for an additional messenger wire, simplifying aerial. 48 Core GYTC8S Fiber Optic Cable Armor Stranded Loose Tube Steel Wire Strength Waterproof Figure 8 Self Supporting Outdoor GYTC8S is a typical self supporting outdoor fiber optic cable, suitable for aerial applications; The cable have nice moisture resistance performance and crush resistance. As one of the professional optical fibre manufacturing companies, TUOLIMA has been manufacturing fiber optic cable including gytc8s or gyxtc8s cable for over 10 years with ISO, UL, RoHS, REACH certificates. The tubes are filled with a water-resistant filling compound. The tubes (and fillers) are stranded around the strength member into a compact. Application: - Suitable for aerial duct and buried method - Long distance and local area network communication - CATV & computer networks system Stranded Loose Tube Figure-8 Self-Supporting Optical Fiber Cable GYFTC8S /GYTC8S (2-144 cores) Self-supporting aerial.
