

High-speed cable tray support

Overview

These tray systems allow excellent ventilation and prevent sagging while routing. Cable trays are an integrated, highly flexible cable support system when used in combination with the matching support structures, covers and system-specific accessories. They are available in perforated (RG) or non-perforated (R) versions, in heavy-duty versions (RS/RGS), for use under sprinkler. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resilience for each of these installation challenges and safety. In the industrial environment. Our cable support. HDT steel cable tray, for heavy duty job, comes in standard height of 50 and 100mm. FCL. us-trations without notice. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Cable carriers (also known as cable tracks and energy chains) are flexible hollow structures composed of links to help guide and protect cables, hoses, and hydraulic lines on equipment and machinery.
