

# High-speed optical-electrical connection for metropolitan area networks QSFP-DD

## Overview

This guide provides a clear overview of 400G ZR QSFP-DD standards, specifications, and selection criteria for coherent pluggable optics in metro and long-haul networks. QSFP-DD ZR Coherent Optics presents a sea of change in the field of optical transportation architecture. Network operators are looking for cost-optimized optical solutions that provide increased density and reduced power consumption—across high-speed as well as legacy ports—without sacrificing network performance or reliability. Quad Small Form-Factor Pluggable Double-Density (QSFP-DD) offers twice as. Smartoptics QSFP-DD transceivers provide cost-efficient 400G and 800G optical networking. QSFP-DD connector portfolio's backwards compatibility allows. In modern data centers and enterprise networks, Quad Small Form-factor Pluggable (QSFP) cables are everywhere. They connect servers, switches, and storage at speeds from 40G to 400G and beyond.
