

How are fiber optic cable markers represented in CAD

Overview

Select Marking on both sides or Marking with reference line as the cable marking type. Alternatively, start the function from the Wirings project tree by right-clicking Cables and selecting Cable marking. I'm wanting to create documentation for a control fiber optic network. Can anyone help me out?

Some examples of a diagram would also help. 10-27-2018 01:41 AM Do you know if there's some symbol standard. Whether laying aerial lines or planning buried conduits, CAD drawings provide an exact representation of proposed network routes, junction boxes, handholes, fiber drops, and splice enclosures. These plans are essential for permitting, engineering review, and contractor execution. Key use cases of. Search by part number or description such as CAT5, CAT6, OSP, etc. Sort by any of the table headers. Sort by any. Cable marker symbols in the schematic library for all the existing standards are now updated to include RATING2 attribute.
