

How long does it typically take for a fiber optic cable to be laid in a basement to provide signal coverage

LoRa handheld portable base station

Overview

The entire process typically takes 2-6 hours for residential installations when an Optical Network Terminal (ONT) is already present, or 4-6 hours if one needs to be installed from scratch. Larger business projects might span several weeks. We want to clear up the confusion around these schedules. Every building has unique needs. Some homes have existing conduits ready for use, while other properties. Once the survey is complete, the fibre cable is laid from the nearest fibre node to your premises. Underground installation: The fibre cable is buried. Fiber internet installation typically takes anywhere from a few hours to a couple of weeks, with the exact timeline depending on factors like location, existing infrastructure, and the complexity of the install. Scheduling the Installation Appointment Once your order is confirmed, the provider will offer available dates for the installation. Getting clear on that early is what. Fiber optic installers perform civil engineering works, fiber optic cable laying, set-up of cabinets and “wall boxes” or termination enclosures, fiber splicing, vertical (riser) and horizontal (floor) cabling, as well as jointing and testing of laid fiber optic cable components.
