

How to coil cables in a small fiber optic terminal box

Overview

Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. Strip the cable the required length, minimum 1 meter or more, to establish easy and safe installation with enough buffer. FTTP or fiber To The Premises applications have reinforced the importance of reliable and stable fiber optic terminations. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. A common question we receive is: How do you use a fiber-optic termination box?

We recommend using a termination box if you're ordering an assembly with more than two strands. It helps keep your connectors free from contamination and dust, while also keeping your assembly neat and organized. They also require the optical fibers to be beautiful.
