

# How to connect the grounding wire in the optical distribution box equipment room

## Overview

Attach a #6 AWG copper ground wire and ground lug together. In a line-up of more than one. Recommendation ITU-T L. 151 refers to the installation of optical fibre ground wire cable. It deals with the factors that should be considered in determining the characteristics of this type of cable, the apparatus that should be used, the precautions that should be taken in handling the reels, and. Power from factory ground must be installed by a qualified electrician. This position is the connection point of the grounding wire in the. Follow these steps at each cable entry point and termination location to achieve a compliant, safe ground bond: Identify metallic components. Strip back approximately 6–8 inches of the outer jacket using a cable splitter or ringing tool. Visually identify armor, strength members, or foil layers. The basic rule achieves this through an equipment grounding jumper; four exceptions.
