

Industrial Switches Power Dedicated

Overview

These robust switches are designed for industrial use and are fully compliant with IEEE 802. 60W and 90W Power over Ethernet (PoE) options via PoE injectors. This gives you the flexibility to build powerful and secure networks, even in harsh environments: copper and FO ports, as well as redundancy. This paper explains the basics of PoE, explores how the industrial sector can benefit from PoE technology, and describes the PoE capabilities that Cisco ® industrial switches offer and the tools available for proper design, monitoring, and deployment. Subscribe to our newsletter for the latest ICT trends. We provide a wide range of PoE/PoE+/PoE++ switches with up to 90 W output per port to deliver high-speed data transmission while powering high-power devices over long distances. Additionally, Smart PoE. WAGO's range of switches ensures the scalability of your ETHERNET network infrastructure, while providing outstanding electrical and mechanical characteristics.
