

Internet Intelligence Ireland

Overview

Prepared by the Department of Enterprise, Trade and EmploymentThe world is changing. We are becoming greener, more sustainable, and more digital. These changes have been accelerated since the onset of the COVID-19 crisis. Overnight, businesses and workers had to adapt to a new reality, embracing new technologies and new ways of working. Digitisation is transforming our lives and our economy, and artificial in. Artificial Intelligence (AI) refers to machine-based systems, with varying levels of autonomy, that can, for a given set of human-defined objectives, make predictions, recommendations or decisions using data.¹ Machine Learning, a subset of AI, is software which is able to learn from applicable datasets to self-improve, without being explicitly prog. Achieving our vision that Ireland will be an interna onal leader in using AI to the benefit of our popula on, through a people-centred, ethical approach to AI development, adop on and use.Effec ve safeguards AI demys fied - a force for good P u ng the Building.
