

Is there potential for growth in fiber optic cable construction

Overview

With the constantly increasing international data consumption rate, the fiber optic cable industry is likely to expand gradually, with the manufacturers prioritizing scalability, longevity, and environmentally sound cable products to support various connection requirements in both. With the constantly increasing international data consumption rate, the fiber optic cable industry is likely to expand gradually, with the manufacturers prioritizing scalability, longevity, and environmentally sound cable products to support various connection requirements in both. The global fiber optic cable market was valued at USD 13 billion in 2024 and is estimated to grow at a CAGR of 10. The growth of market is attributed to factors such as proliferation of data centres and increasing deployment of 5G network. Increased broadband. High internet usage today, growth in broadband connection and increased need of high-speed connection in both the rural and urban regions have highly led to the popularization of fiber optic cables in the different sectors. The industry is expected to grow at a CAGR of 9. 70% during the forecast period of 2026-2035. The demand for fiber optic cables is slated to rise with the growth of the telecommunications sector, surging government intervention. The global fiber optics cable market is experiencing substantial expansion, driven by escalating demand for high-speed internet, the ongoing rollout of 5G networks, and the rapid growth of data centers worldwide. 1 million by 2025, with a Compound Annual. The Fiber Optic Cable Market size was valued at USD 12.
