## Overview

An LC-LC fiber optic cable refers to a fiber patch cable having LC connectors on both ends, connecting equipment like switches, transceivers, or patch panels either inside or between floors or applications used to interconnect equipment in high-density networks with low loss. An LC-LC fiber optic cable refers to a fiber patch cable having LC connectors on both ends, connecting equipment like switches, transceivers, or patch panels either inside or between floors or applications used to interconnect equipment in high-density networks with low loss. This guide provides a fully updated and industry-ready overview of LC fiber optics, explaining the origin and design of LC connectors, their key features, and the complete ecosystem of LC-based products used in modern networking. It covers LC connectors, LC patch cables, uniboot designs, armored. As networks move to higher speeds and higher density, choosing the right fiber optic patch cords becomes critical to the reliability of your system. Whether LC duplex fiber optic patch cables, SC duplex. LC Fiber Optic Patch Cord stands for Lucent Connector. 25 mm ferrule, half the size of the ST. The LC has good performance and is highly favored for single mode. They act as the critical link for interconnecting devices like optical switches, servers, and distribution frames.
