

Liechtenstein OEM EPON equipment 1G

Overview

ONU1710-1G is designed to provide efficient PON solutions for FTTH/O networks. It adopts small size and lightweight design, flexible in deployment and saves space. This cost-effective device provides a 1x GE Ethernet interface, which supports GPON/EPON dual-mode automatic. PON (Passive Optical Network), as an access network technology, can implement fiber optic to the home, satisfying the high-bandwidth requirement of the "last kilometer" in the access layer network. In addition, there are options with 1 or 4 GE ports, as well as Wi-Fi with both 2. As an example, we provide here the calculation of the cost per subscriber using EPON and GPON. 1Ge ONU Dual-mode ONU Supports EPON/GPON/XPON Three Modes Access, BT-PON is a One of The Leader of Network Equipment Manufacturer. GEPON ONU with 1 port GEPON (SC/UPC), 1 port 10/100/1000Base-T (RJ45) Devices belonging to the ONU group are Optical Network Unit terminal subscriber equipment operating on Gigabit Ethernet Passive Optical Network (GEPON, IEEE802. With the introduction of 10G PON technologies, service providers can now leverage existing PON infrastructure to serve commercial business customers more cost-effectively.
