

OTB24M fiber distribution box

Overview

AZE's Outdoor Fiber Optic Distribution Box is applicable in FTTH project and suitable for building's outer walls application; They can distribute cables after installing splitters and also can draw out room fiber optic cables by direct or cross-connections. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. OTRANS strives to provide you with professional, reliable. OTB Fiber Optic Terminal Box is available for the distribution and terminal connection of various types of fiber optic systems, especially suitable for mini network terminal distribution, in which optical cables, patch cords or pigtails are connected as the FTTH network termination point, which is. OTB Fiber Optic Terminal Box is available for the distribution and terminal connection of various types of fiber optic systems, especially suitable for mini network terminal distribution, in which optical cables, patch cords or pigtails are connected as the FTTH network termination point, which is. Fiber Access Terminal Box is used as a termination point for the feeder cable to connect with drop cable in the FTTH network system. Fiber Access Terminal Box integrates fiber splicing, splitting, distribution, storage, and cable connection in one solid protection box.
