Overview

A fiber patch cable is a fiber optic cable with connectors on both ends. They are also called fiber jumpers. As data rates increase from 10G → 100G → 400G → 800G, patch cables must handle more bandwidth, more density, and stricter. As networks move to higher speeds and higher density, choosing the right fiber optic patch cords becomes critical to the reliability of your system. At ZION Communication, we design and manufacture a full range of fiber patch cords for: This guide will help you quickly understand the main types of.
