

Patch wires for electrical boxes and distribution boxes

Overview

Choose patch cables (SC-SC, FC-FC, SC-FC) based on the type of connectors at the splitter and distribution box. Fixed power distribution equipment manufactured by Union Connector includes patch panels, connector strips, specification type outlet boxes and pigtail boxes. These products are designed for overhead or wall mounting in theatrical or studio applications. Union Connector builds these devices to create tidy rows of wire connections that you can identify, test, and adjust on the spot. Route electricity within switchboards and battery banks; also known as bus bars. Expand and reconfigure a data network when space inside your enclosure is limited. Distribute electricity from a single power source. Ethernet patch panels make the connection between field cabling and control cabinet cabling quick and easy. A standard Ethernet patch cable. At MTX Electrical and Engineering we pride ourselves on providing those in the theatre and stage industries with premium electrical goods that are durable to stand up to repeated use in testing environments.
