

Principle of Homemade Distribution Box

Overview

This project involves combining an enclosure, protective devices, and various receptacles into a single, portable, or semi-permanent unit. Building your own distribution box allows for tailored specifications that standard extension cords or wall outlets cannot meet. Sometimes, one is given the opportunity to use many tools to solve a simple problem. In this case, I will attempt to use KiCad, Autodesk Fusion, Bambu Lab X1 Carbon, and Mouser Electronics to build a power distribution box for my 3 Viltrox DC-550 Pro field monitors. The normal operation can be. The distribution box is to assemble the switchgear, measuring instruments, protective appliances and auxiliary equipment in the closed or semi closed metal cabinet or on the screen according to the electrical wiring requirements to form a low-voltage distribution device. It ensures that circuits are safe, organized, and easy to manage.
