

South Asia OTN Router 200G

Overview

The HTN6800-M2H20 is a 200G OTN Transponder/Muxponder board capable of packaging and de-packaging functions from 100G/40G/10G services to OTUC2. The client-side port allows access to 2 channels of 100G services, 4 channels of 40G services, or 20 channels of 10G services. Sharetop's OTN Transponder Platform developed is highly integrated with advanced technology. A single port can stably transmit 200G-rate services. It is mainly used in the core layer and convergence layer network of national optical network backbone lines, operator MAN, data center interconnection. The Huawei OptiX OSN 1800 is a new-generation packet enhanced multi-service optical transport platform that supports unified switching of OTN/PKT/SDH services and access of any 2M to 100G services such as Ethernet, TDM, and private line services. It supports installation in a 19-inch or ETSI. To achieve massive information interaction and meet the demand for ultra-high speed and ultra-bandwidth data center interconnection (DCI), QSFPTek has launched the 200G transponder - a customized OTN transmission platform for DCI applications. Typical client services. M2H20OTN is a high density 1U height 200G OTN muxponder, it adopts the advanced technology and ASIC chip, and it is fully compliant with domestic and international related standards (such as ITU-T G.
