

Spanish Fiber Optic Cold Splice 24 Cores

Overview

A, sp-GJS-24C is made of high impact engineering material, with aluminum outer components and stainless screws which make the structure of the closure more stable. The sealing material is reusable. The box stores direct or derived splices, supporting up to 144 fibers housed inside through splice trays. Mechanical seal between the dome and the base. Infinique Fiber Optic Splice Enclosure has been specifically designed to give greater protection for fiber optic connections. The Closure provides reliable sealing performance, and fiber splicing point protected in a. Techlogiks dome-type enclosures are suitable for indoor and outdoor applications. Core 4 Nos round. Features

- RoHS compliant
- Can be used in through, branch or mid span splice locations
- Suitable for aerial, underground duct or direct burial applications
- Great mechanical performance
- Great resisting aging performance
- High air-proof, damp-proof and resisting, lightning strike performance
- Can be place. The box body is made of reinforced plastic, high strength, resistance, sealed and

APPLICATION: Flame retardant and waterproof, prevent vibration, shock, cable stretching, twisting, etc.

Dome Type Splice Closures

Techlogiks dome-type enclosures are suitable for indoor and outdoor applications. It is well designed to provide enough space for branching and straight-through applications with 24 to 144 fiber splicing

Fiber Splice Enclosure 24 Core, 1~4 Layer Horizontal

Prevents aging of materials caused by heat, cold, light, oxygen and in nature, with excellent mechanical strength. Suitable for overhead, pipeline, direct burial and

Vertical Joint Box/ Dome Type Splice Closure, 24 Cores.

The Closure provides reliable sealing performance, and fiber splicing point protected in a ribbed polypropylene dome that has high mechanical and environmental features.
