

# Ultra-long-distance PoE switch

## Overview

These Power over Ethernet (PoE) switches are specialized networking devices that extend the reach of data and power transmission far beyond the typical 100-meter limitation of standard Ethernet cables. They can transmit power and data to distances up to and in some cases exceeding 200. 24-Port Long Range PoE+ Switch is a powerful network device that effectively extends your PoE range up to 500M, allowing your IP devices to be deployed flexibly anywhere. 1500ft PoE+ Switch doesn't require PoE extenders in the middle. 2600ft UltraReach PoE - All PoE ports adopts Linovision proprietary UltraReach PoE technology and extend PoE & data up to 2,600ft or 800 meters. It offers great flexibility for. IP67-rated, dustproof, and waterproof: With an IP67 rating, this PoE extender is completely dustproof and waterproof, making it suitable for use in a wide range of environments, including outdoor and industrial settings. Delivers data up to 1000 m (3280 ft. When the connected cameras break down or the switch port communication fails.
