

# Unplug the fiber optic cable

## Overview

To properly remove the optical cable: Locate the port > Stabilize the device > Gently grasp & pull the plug (not the cable) straight out > Do the same with the other end > Cover both connectors with plastic tips. However, situations may arise requiring you to disconnect these specialized cables from modems or routers. With delicate glass components and invisible laser operation, caution is necessary. Unplugging a fiber optic cable from a modem is a task that requires careful handling to avoid damaging the delicate fibers within the cable. Fiber optic cables are delicate and require specific handling procedures to maintain their performance and longevity. Is this something that requires a Verizon support tech or can I do it?

If so is it as simple as disconnecting and reconnecting or would I have to call support to "reinitiate" my setup. more Are you interested in seeing how fiber optic connectors get.

## Article Content

How to Safely Remove a Fiber Optic Cable From a Modem

Master the precise, safe technique for detaching fragile glass fiber cables from your modem, ensuring component protection and eye safety.

Disconnect a Fiber-Optic Cable | Juniper Networks

Before you disconnect a fiber-optic cable from an optical transceiver, ensure that you have taken the necessary precautions for safe handling of lasers. See Laser and LED Safety Guidelines and Warnings.

How to unplug fiber optic cable from modem?
