

# Which is better 4Mbps broadband or fiber optic cable

## Overview

Fiber is faster, highly reliable, more durable, and great for cloud-based or real-time work. Cable is cheaper to install and more accessible but can get slower during busy hours due to shared bandwidth and asymmetrical speed. Technically, both can reach 10,000Mbps (10Gbps)—cable internet's overall design just needs to catch up with fiber. Are you looking for better. This guide compares fiber-optic cable and traditional copper internet cable (coaxial cable) across key factors: technology, speed, reliability, and cost in 2025. A fiber optic cable. The key difference between broadband and fiber lies in their underlying transmission medium and resulting performance, with fiber optic vs broadband showing clear advantages in speed, latency, and future-proofing. Learn the pros and cons in this guide. Fiber offers symmetrical speeds up to 10 Gbps and superior reliability, while cable provides wider availability and competitive pricing starting at \$20-80/month. Though fiber is technically superior.
