

Yijian AI cannot connect to the server

Overview

The app will test your camera's ability to connect to YI's servers. If it fails, ensure your router allows traffic on port 80 and port 443. For YI Dome Camera U Pro models, use the Activity Zone Test to confirm the camera is correctly detecting motion and sending data to the app. Then you see it: "Cannot connect to server" This Cannot Connect to Server Error disrupts your server connection instantly, stalling work and raising stress amid common connectivity issues. Problems usually come from a flaky network, server issues like a brief. There are some errors currently happening on the site and I came to bring possible solutions for you to try! These same solutions are also on our server in the "announcements" section described by our beloved Head Moderator Slushi! Below are short tutorials to guide you and test your browsers: ***. To use Burp AI, your network must allow outbound HTTPS traffic to ai. Please download the most up-to-date App. One of which is "Pairing. Check out my post i have an alternative solution.
